

we need to keep the no phone call list alone. why should bankers or anyone have the right to harass consumers in the privacy and safety of their own home. I get more unwanted phone calls and hang up calls and it drives me crazy. I have now put myself on the no call list and hope that it stays the way it was written for the purpose of protecting consumers from this kind of harassment. Please DON'T CHANGE IT!!!!!! I will not be happy if they do change it and I am one of many voters who will be watching what happens here and will make a mental note of whether the politicians are trying to help the general public or the big business. We are sick of the constant disruptions these calls cause. If we wanted the business of the people who call us, we'd call them. Plain and simple.
